

ODR

Seals for 9000 psi flanges

The **ODR** is designed to replace traditional seals in flange seal applications. With bidirectional sealing capability, the **ODR** provides exceptional sealing for static seal applications.

The rectangular base offers stability, preventing seal rolling and the leaks or seal failures commonly associated with a rolled or twisted seal.

Operating conditions

Pressure	≤ 42 MPa
Temperature	-40 to 100°C
Fluids	mineral oils

Materials

NBR	NBR 90 Sh A
------------	-------------

Assembly

On CAT® flanges

Advantages

- Good extrusion resistance
- Long service life
- Easy assembly because the seal is maintained in its housing (captive mounting)
- Good resistance to vibration and low temperatures

Please contact us for applications approaching maximum values.
