The **GODI** is a compact seal for piston rods. It can be used for simple and light-duty cylinder designs used in medium pressure ranges.

The sealing effect is provided by the slide ring being pressed against the sealing surface by the O-ring energiser at pressure. The surface finish should be Ra 0.1 - 0.3 µm.

Compact design, good sliding properties and low break-away forces are the main features of this doubleacting seal.

Operating conditions

Pressure	≤ 36 MPa
Temperature	-35°C to 100°C
Speed	≤ 1 m/s

Materials

Energising element (1)	NBR
Slide ring (2)	PTFE-Bronze

Assembly

In closed grooves

Advantages

- Optimal sealing in tandem system
- Suitable as a primary seal (buffer)
- Small sections
- High extrusion resistance and long service life
- Low break-out and running friction
- Compatibility with nearly all media due to the high chemical resistance of the sealing element and the wide selection of O-ring compounds
